

Personalize or Add a Logo

Workflow Considerations:

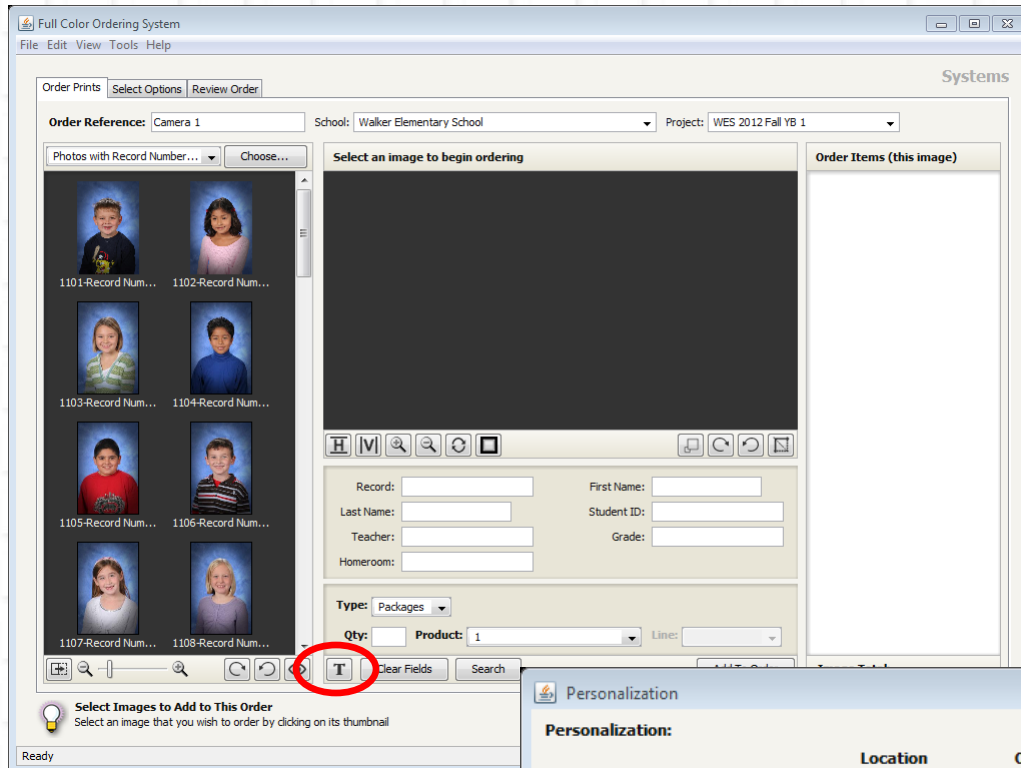

Because of workflow management issues, logos are not recommended if you order graphic products.

Logos cannot be set up to apply automatically to only one order item. For example, you cannot add a logo to all 8x10 prints in an order and exclude all other prints.

If a Logo is desired on an individual item, it must be turned on for that item on each student.

Logos must be set up at the lab before it is available for orders. Contact customer service for details.

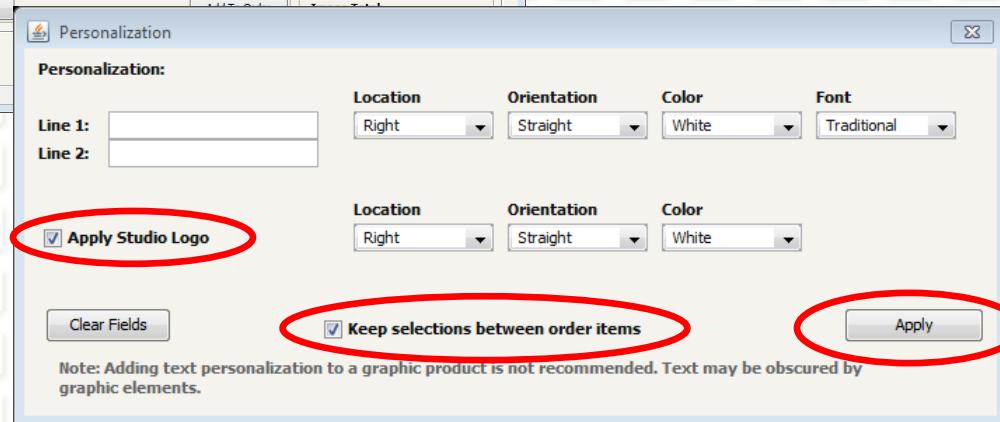

Add a Logo at the Job Level

When a logo is desired on all products in an order, check the “Apply Studio Logo” and the “Keep selections between order items buttons” in the Personalization dialog box.

If you have ordered any items before checking these boxes they will not have a logo.

Everything you add after checking these boxes will have a log until turned off by returning here and unchecking the boxes.

Logo and Personalization Options

The screenshot shows a 'Personalization' dialog box with the following elements:

- Personalization:**
 - Line 1:** Savannah
 - Line 2:** 2012
 - Location:** Right
 - Orientation:** Straight
 - Color:** White
 - Font:** Traditional
- Apply Studio Logo**
 - Location:** Right
 - Orientation:** Straight
 - Color:** White
-
- Keep selections between order items**
-
- Note:** Adding text personalization to a graphic product is not recommended. Text may be obscured by graphic elements.

Position and colors can be chosen. Avoid using both personalization and logos, since they will overlap on most products.

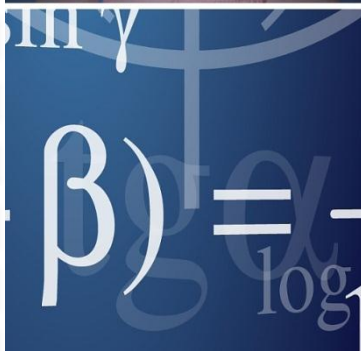

Product Illustrations

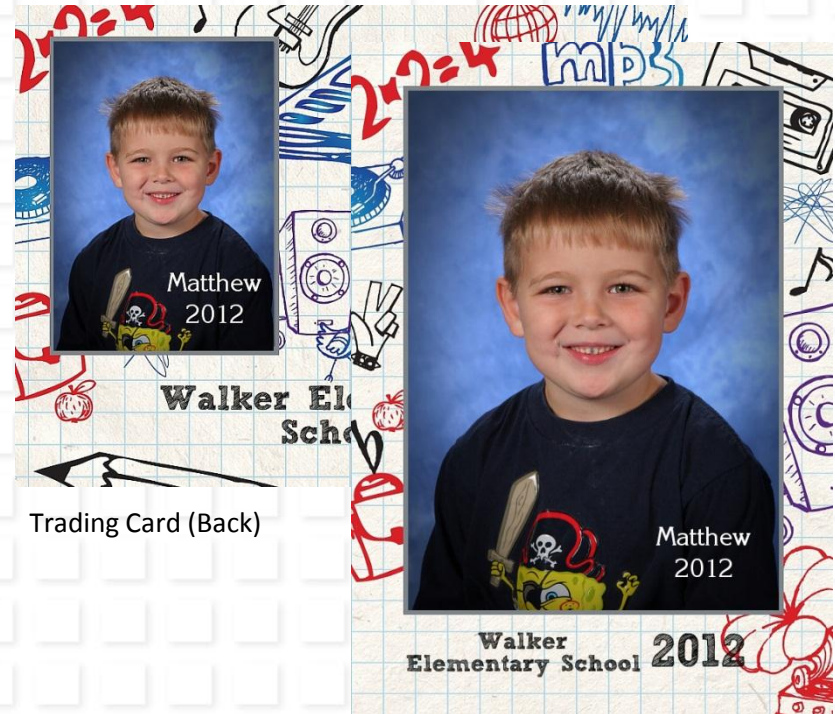

Flashlight Keychain

These show name placement and size on various graphic products.

If you anticipate using personalized products you should order samples of all products to evaluate first.
