

Search for Duplicate Records

Double Click on the Image Folder list to move to the first image in that Folder

The two common searches used to locate and tag duplicate images are shown here.

Search for Duplicate Records

The screenshot shows the Photolynx ImageMatch software interface. The window title is "Photolynx ImageMatch - Lynx High School.mdb". The menu bar includes "File", "Imaging", "Data", "Report", "Export", "Print", and "Help". The main window displays a grid of student records. The second record is highlighted with a red box and a red arrow pointing to it. The record data is as follows:

0001	001.JPG	0002	001E.jpg																	
6		6																		
239343		239343																		
LIMERICK		LIMERICK																		
MARY		MARY																		
10		10																		
T JACKSON		T JACKSON																		

The interface also includes a toolbar with buttons for "FIRST RECORD", "PREVIOUS PAGE", "PREVIOUS RECORD", "FIND STUDENT", "NEXT RECORD", "NEXT PAGE", and "LAST RECORD". A status bar at the bottom indicates "Matched 2 of 12".

Records Processed: 0 Total Duplicates: 0

Filter Off 10/29/2009 12:35 PM

Desktop Norton 12:35 PM

F1 + Right Mouse Click = Mark duplicate for deletion.

NOTE: Do not delete the record from the database. Identifying the image and data as duplicate will exclude it from being passed on to the yearbook or SIS cd.
